

Morning all,

Thank you all for attending the site visit on 27/06/23, please see below for a synopsis of what was discussed.

- 30mph speed limit extension is no longer going ahead, currently just 2x VAS installation.
- Double yellow lines and increasing the footway width outside Church / Kings Arms will not be covered in this project.
- New street lighting will be installed to light up 70m of road on each side of the crossing.
- Belisha beacon on north side of footway will be fitted with a shield to minimize disturbance.
- Dropped kerbs will be incorporated in design for vehicular access to the property adjacent to the north side PROW.
- Existing bt pole will be moved to back of grassed area, off of new footway.
- Zebra works programmed to commence Feb 2024, carriageway surfacing programmed to start early March 2024.

Regarding the unregistered land, I am in the process of getting advice from our legal team so please do not contact land registry. I will inform you of the strategy to obtain the land for the scheme ASAP.

In the meantime, please can you confirm whether the area depicted by the red hatch in the image below is parish owned land.

Any queries please let me know.

Kind regards,

**Samuel Cooper, Apprentice Engineer**
